

PROPOSAL PACKAGE | DOCUMENT 12

Demo Script and Meeting Runbook

Minute-by-minute plan for the first meeting, the storyline for the week 8-9 demo, and the seeded scenario that proves each requirement

Document	12 of 15
Audience	Presenter and delivery team
Version	1.0 (first-meeting edition)
Date	September 2026
Classification	Internal - presenter's copy

Contents

1. First meeting: objective and outcome.....	3
2. Meeting runbook (60 minutes).....	3
3. Week 8-9 integrated demo storyline.....	3
3.1 Seeded scenario.....	3
3.2 Demo flow (25 minutes).....	4
3.3 Success criteria for the demo.....	5
4. Follow-up note template (send within 24 hours of the first meeting).....	5

1. First meeting: objective and outcome

Objective: earn the right to a detailed presentation. Not to close a contract.

Outcome we want: the client agrees to (a) share sample documents under NDA, (b) name a sponsor and product owner, and (c) schedule the detailed session. Ask for these three things explicitly at the end.

2. Meeting runbook (60 minutes)

Time	Segment	What to do and say
0-3 min	Open	Thank them. State the purpose: "We read your brief carefully; today we want to show you our plan, be candid about the choices you will need to make, and agree the next step."
3-8 min	Play back the brief	Restate the four things System 1 must do and the five things System 2 must do (deck slides 3-4). Ask: "Have we understood it correctly?" Listen. Note anything new.
8-16 min	The approach	Slides 5-7: one platform, two products; System 1 pipeline; the claims ledger. Use the phrase "contradictions need structure, not just search".
16-22 min	System 2	Slides 8-9: pipelines and the approval gate. "Nothing leaves the building without a human's name on it."
22-28 min	Data and trust	Slides 10-11: residency patterns; security and audit. Be candid about cross-region inference and the sovereign option.
28-34 min	Plug in real data later	Slide 12: configuration, imports, connectors, demo data removable.
34-42 min	Timeline and commercial model	Slides 13-15: phases, demo at week 8-9, tiers of run cost, pricing structure, client owns everything.
42-46 min	What we need and what you may have missed	Slides 16-17: inputs from the client; the gaps list. Frame the gaps as "decisions that make the project succeed", not criticism.
46-56 min	Questions	Use the Q&A playbook. If a question needs the technical team, say so and log it.
56-60 min	Close	Ask for the three outcomes. Confirm the date of the detailed session. Send the follow-up note within 24 hours.

Materials to bring: the deck (Document 02); printed Executive Summary (Document 01) for each attendee; this runbook; the Q&A playbook (do not hand out). Leave-behind: Executive Summary only. The full pack follows after NDA.

3. Week 8-9 integrated demo storyline

3.1 Seeded scenario

A fictional group, "Al Noor Holdings", is deciding whether to approve a supply contract with "Gulf Precision Industries" and is also progressing an investment discussion with "Marwa Capital". The demo corpus

(about 60 documents in English and Arabic, some scanned) contains **deliberate contradictions and gaps**:

#	Seeded issue	What the demo shows
1	Contract value AED 12.5m in Contract v2; AED 11.8m in the board approval memo	Contradiction flag with both quotes and pages; answer to "what is the contract value?" shows the conflict inline
2	Effective date 1 March in the contract; 15 March in the finance model's inputs	Date contradiction; explanation of tolerance rules
3	Contract v1 has a 24-month term; Contract v2 has 36 months, marked as superseding	No contradiction flagged (version handling); the answer cites v2
4	Contract refers to "Annex B: performance bond" which is not in the corpus	Dangling-reference gap
5	Decision "Approve supply contract" requires a legal opinion; none loaded	Checklist gap listed on the decision page
6	Arabic-language board minute (scanned) records the approved amount	Arabic OCR, cross-language retrieval, cited answer in English
7	Marwa Capital MoU date in CRM (12 March) differs from the signed MoU (14 March)	Cross-system finding shown on the relationship page
8	A question with no answer in the corpus: "What is the CEO's salary?"	Refusal with closest documents listed

3.2 Demo flow (25 minutes)

1. **Login with single sign-on** as an executive. Show the home page: open findings count, decisions with gaps, recent questions.
2. **Ask in plain language**: "What is the value and term of the Gulf Precision supply contract?" Show the answer, citations, page viewer, and the inline contradiction note.
3. **Open the finding**. Show both quotes side by side; assign an owner; add a resolution note; show it disappears from "open".
4. **Open the decision "Approve supply contract"**. Show present, missing and contradicted evidence; the Annex B dangling reference.
5. **Ask in Arabic** or ask about the Arabic minute; show cross-language retrieval and citation of a scanned page.
6. **Ask an unanswerable question**. Show the refusal.
7. **Switch to the CRM**. Show the investor pipeline board (GCC stages), the Marwa Capital relationship page with history, follow-ups, and the finding from System 1 about the MoU date.
8. **Compose an outreach**. Request an AI-assisted draft; show the risk flags; submit; log in as an approver (different user); show that the drafter cannot approve; approve; show the message sent through the connected mailbox and the audit entry.
9. **Reports**. Who was contacted this month; pipeline by stage; overdue follow-ups; approval turnaround.

10. **Admin.** Show adding a custom field and a new stage without code; show the import preview; show the "remove demo data" action (do not run it).
11. **Audit log.** Filter to the session; show the chain.

3.3 Success criteria for the demo

- Every seeded issue in the table above is demonstrated.
- No question in the flow takes longer than 15 seconds to answer.
- The approval gate blocks self-approval in front of the client.
- The client can ask an unscripted question of the corpus and see a cited or refused answer.

4. Follow-up note template (send within 24 hours of the first meeting)

Subject: Follow-up: AI Executive Intelligence Assistant and CRM proposal

Thank you for your time today. As discussed:

- We will send the full proposal pack on receipt of the NDA.
- Next step: detailed session on [date], with our architect, covering the design, security and the commercial model in depth.
- To prepare, we would appreciate: (1) 50-200 sample documents, (2) the names of the sponsor and product owner, (3) your preferred jurisdiction and cloud provider if already decided.
- Open points you raised that we will answer in writing: [list].
